## PROFILE

Software Engineer experienced in building web and mobile applications using React, React Native, Node.js, MongoDB, and JavaScript. Worked with real-time data, API integration, Git, and responsive design. Built modular, maintainable code in team environments.

## PROFESSIONAL EXPERIENCE

### Solochoicez Pvt. Ltd

#### React Native Developer

July 2025 – Sep 2025

- Developed 5 cross-platform mobile apps using React Native and Firebase with 10+ core features including authentication and real-time updates.
- Improved frontend efficiency by writing modular, reusable components, reducing development time by ~30%

### Ideagist Pvt. Ltd

#### Web Developer

Aug 2022 – Nov 2023

- Contributed to 2 websites with 20+ pages, serving 10,000+ users, by developing user-friendly features that improved overall UX.
- Enhanced website performance by 20% through code optimization and removal of redundant data and scripts.

## PROJECTS

### Web Apps

#### Team Task Manager

- Developed a full-stack task management application using React.js, Node.js, and MongoDB, supporting personal and team collaboration.
- Used 8+ REST APIs and multiple user roles, enabling collaborative task tracking.

#### Virtual School

- Built a Flutter-based learning platform with role-based access (3 user types) and real-time course and assignment management via Firebase.
- Enabled real-time updates and centralized data management using Firebase services.

### Mobile Apps

#### Habit and Diet Tracker

- Built a Habit & Diet Tracker using React Native and Firebase Firestore, creating 10+ screens in the process.
- Enabled daily, weekly, and monthly habit tracking with secure authentication.

#### Cookie Clicker

- Built a Cookie Clicker game using React Native with engaging single-player gameplay.
- Implemented upgrade mechanics to enhance progression and player retention.

### Current Projects

#### OfferAlert

- Developed a web & mobile deals app using React, React Native, Node.js, and MongoDB, potentially reaching 10+ million users.
- Built full-stack functionality to manage thousands of deals across multiple card providers.

#### PSX insight

- Developing a web app to visualize Pakistan Stock Exchange trends using React, Node.js, and MongoDB.
- Implements real-time analytics and predictions, helping potentially thousands of investors make informed decisions.

## EDUCATION

Capital University of Science & Technology  
Bachelor's in computer science  
Mar 2022 – Feb 2026

## SKILLS

Frontend	Backend
React	Node.js
React Native	Express.js
Flutter	PHP – Laravel
Bootstrap	MongoDB
Tailwind CSS	PostgreSQL
JavaScript	REST APIs
Game Dev	AI/ML
C#	Python
C++	RAG Systems
GDScript	LLM Integration
Blueprint	AI API Integration

## Tools

Git/Github  
Firebase  
Postman  
Unity  
Godot

## CERTIFICATION

React – FreeCodeCamp  
React Native – FreeCodeCamp  
JavaScript – FreeCodeCamp  
Flutter – Udemy  
LLM Mastery – Udemy  
Gen AI – Udemy

## ACHIEVEMENTS & EXPERIENCES

4x Dean's List/Honors  
Participated in University Hackathon  
Competed in LeetCode bi-weekly
